IBM Systems & Technology Group

<frank.g.soltis>  
IBM iSeries Chief Scientist

<dr.nils.simonson>  
Senior Surgeon

<well known IT profile>

<well known Innovator>

COMMON  
EUROPE

## <& you ...>

... who need to have your system running around the clock, with little to no tolerance downtime and also need to have plans to cover any disaster scenario.

... who are application developer and aims to find out how to be innovated in your work and sure to explore new interesting way to create code.

... who want to know how companies are using their iSeries to be an electronic window to their customers, listen to vendors that are in front of the business.

... who want to be informed about different ways for users to access iSeries, use your web browser, less PC client programs requiring updates and support.

... who are searching for ways to increase the flexibility of your business processes strengthen your underlying IT infrastructure and retain and reuse your existing assets.

... who want to get experts advice, meet colleagues with same questions, present your opinion, visit exhibitors for demonstrations of products that will boost your IT environment.

## <how to get there and where to live>

### Conference facilities

Clarion is one of the newest hotels in Stockholm and is situated on south of Södermalm at Ringvägen 98. The conference facilities are equipped with everything you need for a successful conference. The conference rooms are in light colours and very well air-conditioned for your convenience.

### Hotel rooms

As a conference delegate you have the choice of four different kinds of rooms and price classes with special rates at Clarion. There are moderate, standard, and superior single rooms and standard double rooms with different prices. For details and booking there is a link from the application form on the Common Eu homepage.

### How to find Clarion

The easiest way to come here from Arlanda Airport is to take Arlanda Express, the train that take 20 minutes from Arlanda to the Central station in Stockholm of a cost of about 20 euros. From the station you can either take a taxi to Clarion where the train stops which cost you about 10 euros, or you can take the Sub-way, a 5 minutes walk. You go then with the green line and south bound to Skanstull, which are the fourth stop from the Central station. At the south exit of Skanstull you will see the hotel when you are at the ground level. This will cost you about 3 euros.

You can also take a taxi direct from Arlanda to fixed prices. Be careful to choose an authorized taxi, Taxi Kurir, Stockholms Taxi, O2O-Taxi etc. This fixed rate will varied from 38 to 42 euros.
